

AB TYPE BLOOD GROUP DIET

Blood Type AB Cancer Diet Checklist

- Because Blood Type AB have naturally low stomach acid. It is advised that smaller and more frequent meals. Smaller amounts is OK as with the lower the stomach acid one has the longer the food stays in the stomach.
 - Including regular portions of richly oiled cold-water fish.
 - As excess mucus is created through the consumption of fresh Dairy Products it is advised to have none for the Blood Type AB Diet. But to compensate with small amounts of Cultured products.
 - Eat lots of peanuts as they have a anticariogenic affect on the Blood Type AB.
 - Eat snails (Helix Pomatia) as they are good Blood Type AB cancer fighter.
 - Eat lots of Highly Beneficial fruits and Vegetables, especially those high in fibre an antioxidants.
 - Pickled foods can increase your already high chances of Stomach Cancer so don't Eat "Pickled foods".
 - For your main source of protein look towards Seafood's and Soy Products
 - Get your mane source of protein from other than meat. As the AB Blood group have low levels of Hydrochloric Acid with intestinal alkaline it make it near imposable to digest Meat properly.
 - Drink green tea every day. Limit sugar, caffeine and alcohol. These are some short term "fixes" that ultimately reduce the increase Stress.
-

Week 1

Blood Type Diet and Supplements.

- If you're a Coffee drinker, begin to wean yourself by cutting your daily consumption in half, substituting green tea. My favourite is Madura Green Tea which is readily available through any supermarkets in Australia.
- Do not eat the foods in the AVOID section like - chicken, corn, buckwheat and especially shellfish and beans . These foods seriously interfere with proper metabolism for your blood group.
- Include your most important HIGHLY BENEFICIAL foods at least 3 times this weeks. These include Ghee, Seafood, Soy Products, Vegetables and Peanuts. Try to consume.
- If you have had any Surgery, Chemotherapy or Radiation keep away from the Whole Wheat Products.

Exercise Regimen.

- Plan to exercise at least 4 days this week, for 45 minutes each day.
2-3 Days: Aerobic activity.
1-2 Days: Yoga or T'ai Chi.
- Keep a journal detailing time, activity, distance, rate, weight used and number of repetitions for each exercise.

* Week 1 Success Strategy *

Think positive, Keep your energy up high with healthy snacks so your immune system can be strong. Pick the snacks and food from the Highly Beneficial section. Soy products, Peanuts and Salads with heaps of fruit along with Green Tea.

The Blood Group B Health Cocktails

Apricot seeds are the ultimate Cancer killer from my view as it has been giving me unbelievable results.

If you have suspected or cancer problems.

- Take 6 times a day, grounded or minced up Apricot seeds in Pineapple Juice. Say 1 heap teaspoon, spaced out about 2_ hours. With 10 drops of vitamin A + E solution mixed in the drinks 3 times a day before meals. The reason I use Pineapple Juice is cause Pineapple or Papaya Juices are the best to use when wanting to soften up the cells in your body to receive the vitamins much easier.

If you don't have suspected or cancer problems and want to use the power of the Apricot seed as a preventative not to get Cancer.

- Take 6 to 7 Apricot seeds once a day, grounded or minced up in Pineapple Juice.

Blend well and drink.

- Flaxseed oil is also a potent cancer fighter to build up your immune system. You may want to drink this specially formulated "Membrane Fluidizer Cocktail" every day.

1 tablespoon of Flaxseed oil.

1 Tablespoon high-quality Lecithin granules.

6-8 ounces of your favourite fruit juice.

Blend well and drink.

Week 2

Blood Type Diet and Supplements.

- Begin to eliminate the next level of AVIOD foods-seeds, Beans and Legumes that have negative lectin activity.
- Eat at least 2 to 3 HIGHLY BENEFICIAL animal proteins every day-such as Lamb, Yogurt or Seafood.
- Initially, it is best to avoid foods on the list NEUTRAL. Allowed in frequently.
- Continue to incorporate HIGHLY BENEFICIAL foods into your daily diet.
- If you're a heavy Coffee drinker, continue to cut your Coffee intake, replacing it with Green Tea.

Exercise Regimen.

- Continue to exercise at least 4 days this week, for 45 minutes each day.

2-3 Days: Aerobic activity.

1-2 Days: Yoga or T'ai Chi.

*** Week 2 Success Strategy ***

Cut Your Stress With Meditation

High stress levels will undermine immune system health. Take advantage of Blood Type B's natural ability to relieve stress through Meditation or Guided Imagery. Of all the Meditation Techniques, "T.M." or Transcendental Meditation, has been the most thoroughly studied for its antistress effects. Evidence indicates that Cortisol decreases during Meditation especially for long term practitioners and remains somewhat lower after Meditation. Set aside 20 to 30 minutes every day to Meditate.

Week 3

Blood Type Diet and Supplements.

- When you plan your meals for week 3, choose HIGHLY BENEFICIAL foods to replace NEUTRAL foods whenever possible. For example, choose Lamb over Beef or Blueberries over an Apple.
- Eliminate all AVOID foods.
- Completely wean yourself from Coffee and substitute Green Tea.

Exercise Regimen.

- Continue to exercise at least 4 days this week, for 45 minutes each day.
2-3 Days: Aerobic activity.
1-2 Days: Yoga or T'ai Chi.
Add one day of unstructured exercise, Walking, Biking or Swimming.

*** Week 3 Success Strategy ***

If you're undergoing Chemotherapy, combat Nausea with these strategies:

- Drink plenty of water and non acidic juices (No Caffeine, it Dehydrates).
- Drink little or no liquids with meals.
- Exercise to reduce Stress, which can promote Nausea.
- Avoid the sight and smell of offensive foods.

- Avoid being around smokers.
- Take Apricot seeds.
- Take Ginger Rhizome as a supplement.

Week 4

Blood Type Diet and Supplements.

- Continue at the week 3 level, focusing on HIGHLY BENEFICIAL foods.
- Evaluate the first 3 weeks and make adjustments.
- Completely wean yourself from Coffee and substitute Green Tea.

Exercise Regimen.

- Continue at the week 3 level.
- Evaluate your progress, referring to your journal. Make adjustments to improve your performance.

*** Week 4 Success Strategy ***

Sleep Like A Baby

Maintaining a regular sleep cycle is crucial to the reduction of Stress and the maintenance of a healthy immune system. Circadian Rhythm important for control of Cortisol Levels can be difficult for seniors. Overall, elderly people tend to have more problems with interrupted sleep and Insomnia. You may need to increase your intake of vitamin B12 or take Melatonin supplement.

Blood Type AB

Cancer Fighting Super Foods

Yogurt - Cultured dairy promotes intestinal health.

Kefir - Cultured dairy promotes intestinal health.

Ghee (Clarified Butter) - Contains short chain fatty acids, which improve intestinal health and prevent Cancer.

Richly Oiled Cold Water Fish - Source of Omega 3 fatty acids.

Flax (Linseed) Oil - Alpha Linolenic Acid may help prevent metastasis of Breast Cancer Cells.

Walnuts - Inhibits Toxins (O.D.C.).

Domestic Mushrooms - Lechin stimulates cell differentiation.

Onion - Inhibits polyamine production.

Cabbage - Indole 3 Carbinol acts as an Aromatase Inhibitor.

Brussels Sprouts - Indole 3 Carbinol acts as an Aromatase Inhibitor.

Cauliflower - Indole 3 Carbinol acts as an Aromatase Inhibitor.

Broccoli - Protects against polyamines.

Garlic - Inhibits Polyamine production.

Red Grapefruit - Source of the Antioxidant Lycopene.

Watermelon - Source of the Antioxidant Lycopene.

Grape Juice - Aromatase Inhibitor.

Guava - Source of the Antioxidant Lycopene.

Jackfruit - Lectin agglutinates T Antigen.

Elderberry - Inhibits Toxins (O.D.C.).

Blueberry - Inhibits Toxins (O.D.C.).

Cherry - Inhibits Toxins (O.D.C.).

Dill Weed - Inhibits Polyamine production.

Tarragon - Inhibits Polyamine production.

Turmeric - Inhibits Polyamine production.

Weight Reducing Foods

Green Vegetables, Meat, Eggs, Liver, Licorice Tea

Food Values

Highly Beneficial - Foods that are known to have specific disease fighting qualities for your blood type. Also foods with components that enhance the Metabolic, Immune or structural health of your blood type.

Neutral - Foods that normally have no direct blood type effect but supply a variety of nutrients necessary for a healthful diet. Also Foods that normally have no blood type effect but can interfere with health when consumed regularly.

Avoid - Foods with components that are harmful to your blood type.

Meat

Highly Beneficial:-

Goat, Lamb, Mutton, Rabbit, Venison.

Neutral:-

Beef, Buffalo, Liver (Calf / Chicken / Pig), Ostrich, Pheasant, Turkey, Veal.

Avoid:-

All commercially processed meats, Bacon, Chicken, Cornish Hen, Duck, Goose, Grouse, Guinea Hen, Ham, Heart (Beef), Horse, Partridge, Quail, Squab, Squirrel, Sweet Bread, Pork, Poussin, Turtle.

Blood Type AB: Meats / Poultry

Portion serves - 4 to 6 oz (Men) / 2 to 5 oz Women and Children

	African	Caucasian	Asian
<u>Secretor</u>	3 to 6 oz	2 to 6 oz	2 to 5 oz
<u>Non-Secretor</u>	4 to 7 oz	4 to 7 oz	4 to 7 oz
